1. Objective

The aim of this policy is to constitute the document and framework of reference for the planning, organization, execution, monitoring, control and continuous improvement of the Environmental Management System of Grupo T-Solar Global S.A. (hereinafter, "GRUPO T-SOLAR") seeking to promote the achievement of Sustainable Development Goals, in accordance with the principles of sustainability universally accepted and promoted by the United Nations, with the active participation of employees and other stakeholders.

Based on this statement of commitments, the organization draws up a detailed program of environmental objectives that will be reviewed annually.

2. Scope

Grupo T-Solar's main activity is the development, financing, construction management and operation of solar plants (PV and CSP Plants). As a leading company in the production of renewable energies, it has a track record of developing and operating 53 plants in Spain, Italy, Peru, Japan, the USA and India.

This policy applies to Grupo T-Solar, senior management, employees and those who work with or on behalf of the company for a certain period of time.

3. Responsibilities

The content, intent, maintenance, review and distribution of this policy are the responsibility of the Legal and Compliance Department.

Company employees and other stakeholders are expected to understand and participate in the implementation of the Policy.

This environmental policy must be maintained as documented information, be communicated within GRUPO T-SOLAR and be accessible to all stakeholders.

In order to achieve the implementation of the Policy, the company must have a high level of commitment to it.

4. Commitments

GRUPO T-SOLAR, in addition to contributing to climate change mitigation and pollution prevention as a producer of renewable energy, its strives to identify, evaluate, control, minimize and/or prevent the environmental impacts derived from its activity, both those foreseen during the development of new projects and those generated in PV and CSP plants already in operation.

To this end, the company establishes the following commitments:

4.1 Comply with environmental legislation

GRUPO T-SOLAR is committed to complying with the legislation and all environmental regulations that are closely related to the environmental aspects identified in the organization and with their corresponding environmental impacts, as well as with the applicable sectorial regulations.

4.2 Reduce environmental impact

The company identifies and evaluates to prevent, correct and/or mitigate significant environmental impacts, especially those related to air emissions during the construction phase of electricity generation projects from renewable sources and the subsequent visual perception of these installations on the landscape.

4.3 Contribute with circular economy

The company is committed to optimizing the management of its waste both in its PV plants, with the recycling of PV modules through an authorized certified manager, and in CSP plants, where hazardous and non-hazardous waste is stored and labelled according to its condition and delivered to an authorized manager. GRUPO T-SOLAR also recycles the waste generated in its offices thanks to the correct segregation, storage and final disposal of the same in special containers.

4.4 Life cycle Assessment (LCA)

GRUPO T-SOLAR requires its suppliers to be involved in environmental protection in order to reduce the impacts of the supply chain, for example, by involving the environmental area in the processes of purchasing products or services to be contracted.

4.5 Maintain accessibility and transparency

GRUPO T-SOLAR reports on its environmental performance in a transparent manner through the preparation of documents, news and articles, among others, and their publication on the web, in order to be accessible to the general public and especially to employees, public administration, suppliers, shareholders, local population, NGOs, associations and contractors. In addition, since joining the United Nations Global Compact in 2018, it has published a Sustainable Report on the website of the Spanish Global Compact network, reporting on the definition, progress and achievement of ODS.

4.6 Walk towards #ZEROWASTE

The company continues to reduce the presence of single-use plastics in the offices, reusing all those materials that allow it, and implementing technological tools that replace the use of paper and printers. It also returns to the supplier the fruit left over from the weekly orders it places for office consumption in the office, so that it can be recycled. All of this, in order to add to the much needed Zero Waste movement.

4.7 Provide environmental training and information

GRUPO T-SOLAR trains its employees in good environmental practices to promote the sustainable use of resources and periodically informs them about changes, updates and new developments in environmental management.

4.8 Ensuring the protection of biodiversity

The company ensures the protection of the species and ecosystems surrounding GRUPO T-SOLAR's activities by proposing, establishing and complying with all the necessary preventive, corrective and/or compensatory measures.

4.9 Periodic review of environmental policy

GRUPO T-SOLAR adapts its environmental policy to the new demands of the law, of the environment and of the surroundings, maintaining a permanent focus on continuous improvement.

4.10 Raising awareness through participation

The company participates in different environmental education activities and collaborates with different associations, such as awareness campaigns against energy poverty or native forest reforestation activities, among others.
